Learn about the benefits of using recycled water in your landscaping projects and best management practices for caring for landscapes with recycled water.

Carlsbad Municipal Water District and Olivenhain Municipal Water District, on behalf of the North San Diego Water Reuse Coalition, are hosting two workshops to educate new and potential recycled water users on how to adjust their landscaping care to accommodate differences between potable and recycled water. Meet a panel of landscape managers and engineers who specialize in recycled water use and landscaping practices. Learn answers to common questions addressing conversion costs, equipment requirements, and best practices.

Lunch will be served at both workshops!

**Workshop #1**
Wednesday, November 14, 2018
11:00 A.M. – 2:00 P.M.
Ewing Irrigation and Landscape Supply
6104 Avenida Encinas
Carlsbad, CA 92011

[Click Here to RSVP](#) or visit [www.olivenhain.com/events](http://www.olivenhain.com/events) or call 760-438-2722

Please RSVP by November 8, 2018 by following the links above.

**Benefits of Recycled Water**
- Costs less than potable water at most local agencies
- Decreases reliance on imported water
- Not impacted by drought restrictions
- Comparable water quality with potable water
- Reduces greenhouse gas emissions
- Creates more than 10,000 jobs
