1

Account information including when your bill is due, the last two dates your meter was read, and total units used during this billing period.

2

Information about your water usage during the past 13 months and your average gallons per day use.

3

If you are not signed up for eBill, return this section with your payment.

4

Fees and charges including your total amount due.

5

Any important announcements will display here.

**1. Account Summary**

This section includes your customer-account number, service address, amount due, and the bill due date. Note that the due date is for current charges only; any unpaid balance is due immediately and subject to fees.

This section also shows the date that your water meter was read, how much water was used since the previous read, and how many days are included in this billing cycle. Usage is measured in units of hundred cubic feet; each unit is equal to 748 gallons.

The “Meter #” listed on your bill statement refers to the serial number of your meter’s dial. This is not a number that most customers can easily locate, so please contact customer service at 760-753-6466 should you have any questions about your equipment. If you would like to learn how to read your meter, or how to use it as a leak detector, please visit [www.olivenhain.com/meter](http://www.olivenhain.com/meter).

**2. Water Usage History**

To help customers use water efficiently, OMWD provides data showing how your most recent meter read compared to the previous 36 months.

**3. Detachable Bill Payment Stub**

For customers that have not already switched to eBills, the part of the bill below the perforation contains information vital to OMWD for prompt processing of your payment. If you pay your bill by mail, this portion is detached and returned with your check. If the mailing address on the stub is incorrect or outdated, please contact OMWD at 760-753-6466.

**4. Billing Details**

This section provides account activity such as your previous balance, payments received, current balance, and other itemized charges. Here is a quick explanation of some of those charges:

- Water Consumption charges are determined by the amount of water consumed during the billing period at the water rate that applies to your meter. For a complete list of all charges, visit [www.olivenhain.com/rates](http://www.olivenhain.com/rates).
- SDCWA Infrastructure Access Charge is assessed by the San Diego County Water Authority on all permanent water meters not used for fire protection. The purpose of the charge is to cover a portion of the debt service costs associated with the construction of county-wide water infrastructure projects. For more information, call SDCWA at 858-522-6600.
- System Access Charge is designed to recover a portion of the fixed costs of OMWD’s operation. These costs include maintenance of meters, debt service, depreciation, and customer service costs for meter reading and billing.
- The Rate Reimbursement Credit is applied to potable water consumption for settlement amounts received by OMWD from San Diego County Water Authority for overcharges on potable water wholesale costs from 2011 to 2017.

Meters serving automatic fire sprinkler systems are billed Fire Protection Service Charges monthly.

**5. Important Messages**

Customers can find current information regarding OMWD operations and programs in this area.
