PIPELINE PROJECT

Manchester Avenue

POTABLE WATER PIPELINE PROJECT

Across the country, drinking water is delivered via one million miles of pipes. Aging water mains that are not maintained or replaced can break. These main breaks often waste millions of gallons of treated water, interrupt water service to homes and businesses, and require costly and disruptive emergency repairs.

Olivenhain Municipal Water District is committed to providing its customers with safe, reliable, and high-quality drinking water. This is why OMWD takes a proactive approach in repairing and replacing aging water infrastructure. These proactive measures help prevent disruptive main breaks while meeting your neighborhood's water needs.

Pipelines near the intersection of Rancho Santa Fe Road and Encinitas Boulevard are approaching the end of their lifespan. Beginning this fall and over an anticipated nine-month construction period, this project will replace and relocate:

- Approximately 1,200 feet of 12-inch pipeline in Manchester Avenue from Colony Terrace north to Encinitas Boulevard
- Approximately 450 feet of 12-inch pipeline in Encinitas Boulevard west of Rancho Santa Fe Road
- Approximately 200 feet of 12-inch pipeline in Rancho Santa Fe Road north of Encinitas Boulevard
- Approximately 900 feet of 8-inch pipeline in South Rancho Santa Fe Road

OMWD will be focusing on the following areas to reduce the impact of the project to residents and businesses around the construction site:

- Continuity of water service
- Traffic control
- Access to businesses and residences
- Noise and light during construction
- Access for services such as deliveries, mass transit, and emergency vehicles

OMWD will work carefully to minimize the duration of any temporary water service interruptions to customers. A city-approved traffic management plan will be implemented during construction and work is currently anticipated to be completed at night to minimize traffic impacts.

We welcome your input

The public is invited to learn more about this critical infrastructure project. In observance of social distancing requirements, you are invited to an interactive virtual meeting to provide project details and answers to your questions. A Zoom video conference will occur on June 11, 2020 at 4:00 p.m. You may access the meeting or view a recording of the presentation after the meeting has concluded at www.olivenhain.com/projects. If you have any additional questions, please contact us via email at projects@olivenhain.com or by calling **760-632-4235**.
